HOW TO BE HAPPY

Happiness is always making headlines. But how do we find happiness? Happiness expert, Sandra Bagchi, gives us her top happiness tips.

First, know yourself! What sort of person are you? Does working on a team drive you crazy? Look for a different type of job. Do you wish you could contribute more to society? Start volunteering. Are you sociable and outgoing? Join some clubs. If you don't know and understand your personality type, you risk doing all the wrong things.

Second, think less about yourself and more about others. Research shows that being generous, kind, and compassionate towards other people, animals, and the environment can lead to greater personal happiness. Help an older person with a chore, give an animal a loving home, visit someone who is feeling lonely – even the simplest acts can make a difference, so don't underestimate the impact you might have.

Third, go outside. It's a happy habit! There is almost nothing better that you can do to improve your mood and your health. Most of us need to get fresh air much more frequently than we do. Why not go for a walk in the park, play a game of baseball with your kids, take the dog for a long hike in the mountains, or spend time at the beach? You'll increase your Vitamin D levels, boost your mood, and have fun, all at the same time.

And finally, enjoy the company of friends and family. It's natural for us to be with other people. We're social creatures, after all.
